PROFILE

Curious and ambitious developer with a strong drive to learn and contribute. Passionate about smart solutions and teamwork that values openness and continuous improvement. With years of fashion industry experience, I bring a sharp eye for functionality, design and quality, helping me create clean, scalable and maintainable code.

EXPERIENCE

Pattern Maker

Åhléns - Stockholm | May 2017 – Currently

Responsible for fit, functionality and sizing for Wera, Carin Wester, Åhléns and Rikiki. Actively drive the product development process and lead fitting sessions.

Software Developer Intern, Configuration Software

Atlas Copco – Stockholm | December 2024 – June 2025

I worked in an agile team using Scrum and SAFe, gaining experience in React, TypeScript, C#, .NET, unit and end-to-end testing, Azure DevOps, Docker, Kubernetes and microservices architecture. I contributed to several features, including implementing translations, styling with Bulma, building a reusable TanStack Table component, and integrating a WebSocket connection with SignalR. The role strengthened my skills in agile workflows, team collaboration and full stack application development.

Junior Pattern Maker

Tiger of Sweden - Stockholm | August 2015 – May 2017

Pattern Maker Assistant

Polarn O. Pyret - Stockholm | December 2013 – July 2015

EDUCATION

Higher Vocational Education Diploma, Full Stack Developer Javascript

Chas Academy - Stockholm | September 2023 – June 2025

Learned to design and develop fullstack web applications using technologies such as React, TypeScript, Vue.js, Node.js, PostgreSQL and MongoDB. Worked both independently and in teams, regularly presenting project progress through demos. Gained practical experience with RESTful API, responsive UI development, Git version control and CI/CD workflows.

Advanced Higher Vocational Education Diploma, Textile Technology

Borås Vocational University - Borås | September 2011 – November 2013

Textile College Preparatory Education

Värnamo Folk High School - Värnamo | August 2010 – June 2011

Basic Military Training

The Swedish Armed Forces, Amf 1 - Gotland | February 2010 – April 2010

ADDITIONAL SKILLS

Collaborative School Project

Chas Academy – Stockholm | March 2024 – June 2024

Worked in a cross-functional team of 12 developers, UX designers and DevOps engineers across multiple classes to develop an AI-powered Dungeons & Dragons style game focused on emergency preparedness, featuring the scenario “Om krisen eller kriget kommer”. Coordinated efforts using agile methodologies and continuous integration/deployment to deliver a well-integrated and polished product.
